**MYSTIC**

**YEAR ESTABLISHED**
(U) 2009

**DESCRIPTION**
(TS/SI/NF) MYSTIC is an SSO program for embedded collection systems overly installed on target networks, predominantly for the collection and processing of wireless/mobile communications networks. The overt purpose is for legitimate commercial services for the Telco’s themselves; our covert mission is the provision of SIGINT.

**INTELLIGENCE VALUE**
(TS/CI/NF) These systems directly support mission Counter Terrorism, Counter Narcotics, and International Crime missions.

**MAJOR TARGETS**
(TS/CI/NF) The MYSTIC program encompasses a number of subprograms, which are variously sponsored by NCSC, DEA, and CIA.
