

1. Fresh install of Firefox.
2. Copy suspect's profile into your application\mozilla\profiles folder. My path for this is: C:\Documents and Settings\Administrator\Application Data\Mozilla\Firefox\Profiles
3. Copy the suspect's profile name. In this case it's "xrqbhg0s.default"
4. Locate the profiles.ini in the Firefox folder (up one level) and open with notepad.
5. Edit the contents to match this:

```
[General]
StartWithLastProfile=1

[Profile0]
Name=default
IsRelative=1
Path=Profiles/xrqbhg0s.default
```

6. Save your edits.
7. Close all windows.
8. Restart Firefox. The program may crash, simply restart Firefox.
9. Once the browser is up, click on TOOLS, OPTIONS, PRIVACY, SAVED PASSWORDS, VIEW SAVED PASSWORDS, SHOW PASSWORDS, and YES.
10. IF the suspect has saved his username/passwords with Firefox, they will be visible. Also of value, are the NEVER SAVE PASSWORDS, they can indicate a possible user account.
11. IF there are multiple profiles, restart the procedure at step 2. :)

Do NOT Hesitate to call if you have questions!

Here are screenshot of your suspect info from profile: xrbhg0s.default
